Education

Tongji University

Master of Interaction Design, College of Design and Innovation, GPA: 3.91/4, 93/100

2023.09 - Present

Shanghai, China

- Courses: Interaction Design (95), Collaborative Design (95), Open Design (97), Algorithm Design (98)
- Advisor: Prof. Nan Cao

Soochow University

Bachelor of Computer Science and Technology, GPA: 3.8/4, 90/100, top5%

2019.09 - 2023.06

Suzhou, China

- Courses: Advanced Mathematics (95), C++ Programming (98), Probability and Statistics (92), Algorithm Design (92), Linear Algebra (91)

Publications

ClayScape: GenAI-Supported Design to Clay 3D Printing in Fabricating Chinese Textured Ceramics

2026

S Liu*, H C S Mok*, L Ling, T Klein, R LC, (Accepted, to appear)

DIS

"Re-Tell the Fortune so I Can Believe It": How Chinese User Communities Engage with and Interpret GenAI-based Fortune Telling

2026

L Ling, X Zheng, G Cao, R LC, (Accepted, to appear)

CSCW

Vistoria: A Multimodal System to Support Fictional Story Writing through Instrumental Text-Image Co-Editing

2026

K Fu*, J Huang*, L Ling*, S Hong, Y Zuo, R LC, T J Li

CHI

TunTun Diary: Exploring AI-Generated Storytelling and Virtual Companionship for Nightmare Relief

2025

Z Wang, S Luo, S Tian, Y Cai, L Ling, M Xu, J Yu, G Lu, J Zhu, L Luo

SIGGRAPH Asia

EmotiCrafter: Text-to-Emotional-Image Generation based on Valence-Arousal Model

2025

S Dang*, Y He*, L Ling, Z Qian, N Zhao, N Cao

ICCV

"An image of ourselves in our minds": How College-educated Online Dating Users Construct Profiles for Effective Self Presentation

2025

F Zhang, Y Chen, X Zeng, T Wang, L Ling, R LC

CSCW

LIFEELING: A "Detox" Metaphor-Based Fitness Tracking and Reminder Device Designed for Elderly

2024

L Ling, X Zheng, J Pan, H Chen, Y Diao, G Liu

CSCW

Sketchar: Supporting Character Design and Illustration Prototyping Using Generative AI

2024

L Ling, X Chen, R Wen, J Li, R LC

CHI Play

FLOW: Filtering and LSTM-based Optimization for Web Browser Interactions

2023

D Pan, Z Li, L Ling, G Fei

CHCHI

Research Experience

Microsoft Research Asia(MSRA)

2026.01 - Present

Research Intern, Mentor: Nan Chen, System and Engineering Group

Shanghai, China

- Exploring novel paradigms for human-AI collaboration on infinite canvas interfaces, enabling users to consume information through spatial and multimodal interactions for enhanced sensemaking.

Intelligent Big Data Visualization Lab

2024.03 - Present

Master Student, Advisor: Nan Cao, Tongji University

Shanghai, China

- **Project: CaPace.** A head-mounted haptic system for real-time attention regulation in adults with ADHD, integrating EEG signal collection, CNN-LSTM-based attention classification, and context-aware vibrotactile biofeedback. Finished as my **master's thesis**.

- **Project: EmotiCrafter.** A text-to-emotional-image generation model based on Stable Diffusion and the Valence-Arousal model, introducing a novel emotion-embedding mapping network. Published at **ICCV '25**.

Studio for Narrative Spaces

2023.06 - Present

Research Assistant, Advisor: Ray LC, City University of Hong Kong

Hong Kong, China

-  **Project: ClayScape.** A workflow bridging GenAI-supported design and clay 3D printing for fabricating Chinese textured ceramics. Contributed to system design and user study. Published at **DIS '26**.
-  **Project: "Re-Tell the Fortune so I Can Believe It".** A mixed-methods study to investigate how Chinese communities engage with GenAI-based divination. Published at **CSCW '26**.
-  **Project: Vistoria.** A multimodal system supporting fictional story writing through instrumental text and image co-editing, introducing operations like lasso, collage, and perspective shifts. Published at **CHI '26**.
-  **Project: Carbon Copy.** A GenAI-powered fake dating website critically examining AI's influence on social interactions. Exhibited at the **20th Athens Digital Arts Festival** and related paper published at **CSCW '25**.
-  **Project: Sketchar.** A GenAI tool enabling game designers to prototype characters through sketch-based interaction with ChatGPT and DALL·E. Published at **CHI Play '24** (PACM HCI).

Center for Digital Innovation

2022.12 - 2024.03

Visiting Student, Advisor: Xiaohua Sun, Tongji University

Shanghai, China

-  **Project: DBS System.** A digital-twin system for deep brain stimulation surgeries with 3D brain modeling and WebGL communication. Delivered to **Beijing Chaoyang Hospital** in collaboration with **Intel Labs**.
-  **Project: DHD Diagnosis System.** A remote diagnosis system using the customized MetaHuman as a virtual doctor. Led the design and animation development of digital human. Finished as my **bachelor's thesis**.

Work Experience

ByteDance Ads Infra - ML Infra

2022.10 - 2023.04

FE Engineer Intern, serving as a developer for multiple platforms.

Hangzhou, China

- Developed platforms to support advertising materials management, data mining, sample modeling, feature engineering, etc. For example, web online compiler and file management for advertising recall, lineage diagrams for advertising features, and tag management for advertising materials.
- **Highlight:** collaborated across **5** teams, maintained a total of **8** advertising platforms, of which **3** were independently developed from scratch. These platforms provide advertising services for **all** the ByteDance's products to help achieve **tens of billions** of dollars in revenue.

Microsoft M365

2022.07 - 2022.10

Software Engineer Intern, optimizing the monitoring platform.

Suzhou, China

- Utilized tools and the visualization panel to identify solutions for reducing latency. Embedded time logger tool to monitor web latency and success rate of APIs. Added a visualization panel to display the collected data.
- **Highlight:** helped the team identify issues related to re-rendering and long request times for chart data. by optimizing component lifecycles, reduced rendering latency by **20%**.

Microsoft M365

2021.07 - 2021.10

Software Engineer Intern, assisting in the construction of various basic services.

Suzhou, China

- Improved XAM ARM deployment template diagnostic process. A script was written based on the JSON tree comparison algorithm for determining consistency, displaying the differences between various templates.
- Adopted the **Bot Framework SDK**, added custom components to the chat robot. Embed the chat robot in Teams, allowing developers to quickly obtain the required monitoring information through Teams conversations.

Selected Honors and Awards

- Excellent Master scholarship in Tongji University (**Top 2%**) 2025
- American New Concept Design Art Award (**Second Prize**) 2024
- National Computer Design Competition (**Third Prize**) 2023
- Mathematical Contest In Modeling (**Meritorious Winner, Top 7.5%**) 2022
- Academic Excellence Scholarship in Soochow University (**Top 4%**) 2020, 2021, 2022
- Academic Pacesetter in Turing Class(**Top 3%**) 2020

Skills

- **Skills:** PRD Writing, UI/UX Design, Data Analysis, Full-stack Development, English(CET-6)
- **Tools:** Figma, React, Flask, Blender, WebGL, Unity, BambuStudio, MySQL, LaTeX
- **Programming Language:** JavaScript/TypeScript, Python, HTML, CSS, Arduino, C++, Java
