Education

Tongji University

Master of Interaction Design, College of Design and Innovation, GPA: 3.91/4, 93/100

2023.09 - Present

Shanghai, China

- Courses: Interaction Design (95), Collaborative Design (95), Open Design (97), Algorithm Design (98)
- Advisor: Prof. Nan Cao

Soochow University

Bachelor of Computer Science and Technology, GPA: 3.8/4, 90/100, top5%

2019.09 - 2023.06

Suzhou, China

- Courses: Advanced Mathematics (95), C++ Programming (98), Probability and Statistics (92), Algorithm Design (92), Linear Algebra (91)

Work Experience

Microsoft Research Asia(MSRA)

Research Intern, working on human-AI interaction.

2026.01 - Present

Shanghai, China

- Exploring novel paradigms for human-AI collaboration on infinite canvas interfaces, enabling users to consume information through spatial and multimodal interactions for enhanced sensemaking.

ByteDance Ads Infra - ML Infra

FE Engineer Intern, serving as a developer for multiple platforms.

2022.10 - 2023.04

Hangzhou, China

- Developed platforms to support advertising materials management, data mining, sample modeling, feature engineering, etc. For example, web online compiler and file management for advertising recall, lineage diagrams for advertising features, and tag management for advertising materials.
- **Highlight:** collaborated across 5 teams, maintained a total of 8 advertising platforms, of which 3 were independently developed from scratch. These platforms provide advertising services for all the ByteDance's products to help achieve tens of billions of dollars in revenue.

Microsoft M365

Software Engineer Intern, optimizing the monitoring platform.

2022.07 - 2022.10

Suzhou, China

- Utilized tools and the visualization panel to identify solutions for reducing latency. Embedded time logger tool to monitor web latency and success rate of APIs. Added a visualization panel to display the collected data.
- **Highlight:** helped the team identify issues related to re-rendering and long request times for chart data. by optimizing component lifecycles, reduced rendering latency by 20%.

Microsoft M365

Software Engineer Intern, assisting in the construction of various basic services.

2021.07 - 2021.10

Suzhou, China

- Improved XAM ARM deployment template diagnostic process. A script was written based on the JSON tree comparison algorithm for determining consistency, displaying the differences between various templates.
- Adopted the **Bot Framework SDK**, added custom components to the chat robot. Embed the chat robot in Teams, allowing developers to quickly obtain the required monitoring information through Teams conversations.

Publications

ClayScape: GenAI-Supported Design to Clay 3D Printing in Fabricating Chinese Textured Ceramics

S Liu*, H C S Mok*, L Ling, T Klein, R LC

2026

DIS

"Re-Tell the Fortune so I Can Believe It": How Chinese User Communities Engage with and Interpret GenAI-based Fortune Telling

L Ling, X Zheng, G Cao, R LC

2026

CSCW

Vistoria: A Multimodal System to Support Fictional Story Writing through Instrumental Text-Image Co-Editing

K Fu*, J Huang*, L Ling*, S Hong, Y Zuo, R LC, T J Li

2026

CHI

TunTun Diary: Exploring AI-Generated Storytelling and Virtual Companionship for Nightmare Relief

Z Wang, S Luo, S Tian, Y Cai, L Ling, M Xu, J Yu, G Lu, J Zhu, L Luo

2025

SIGGRAPH Asia

EmotiCrafter: Text-to-Emotional-Image Generation based on Valence-Arousal Model <i>Y He, S Dang, L Ling, Z Qian, N Zhao, N Cao</i>	2025 ICCV
"An image of ourselves in our minds": How College-educated Online Dating Users Construct Profiles for Effective Self Presentation <i>F Zhang, Y Chen, X Zeng, T Wang, L Ling, R LC</i>	2025 CSCW
LIFEELING: A "Detox" Metaphor-Based Fitness Tracking and Reminder Device Designed for Elderly <i>L Ling, X Zheng, J Pan, H Chen, Y Diao, G Liu</i>	2024 CSCW
Sketchar: Supporting Character Design and Illustration Prototyping Using Generative AI <i>L Ling, X Chen, R Wen, J Li, R LC</i>	2024 CHI Play
FLOW: Filtering and LSTM-based Optimization for Web Browser Interactions <i>D Pan, Z Li and L Ling, G Fei</i>	2023 CHCHI

Research Experience

Intelligent Big Data Visualization Lab <i>Advisor: Nan Cao, Tongji University</i>	2024.03 - Present <i>Shanghai, China</i>
🔗 Project: CaPace. A head-mounted haptic system for real-time attention regulation in adults with ADHD, integrating EEG signal collection, CNN-LSTM-based attention classification, and context-aware vibrotactile biofeedback. Finished as my master's thesis. 🔗 Project: EmotiCrafter. A text-to-emotional-image generation model based on Stable Diffusion and the Valence-Arousal model, introducing a novel emotion-embedding mapping network. Published at ICCV '25.	
Studio for Narrative Spaces <i>Advisor: Ray LC, City University of Hong Kong</i>	2023.06 - Present <i>Hong Kong, China</i>
🎥 Project: ClayScape. A workflow bridging GenAI-supported design and clay 3D printing for fabricating Chinese textured ceramics. Contributed to system design and user study. Published at DIS '26. 🔗 Project: "Re-Tell the Fortune so I Can Believe It". A mixed-methods study to investigate how Chinese communities engage with GenAI-based divination. Published at CSCW '26. 🔗 Project: Vistoria. A multimodal system supporting fictional story writing through instrumental text and image co-editing, introducing operations like lasso, collage, and perspective shifts. Published at CHI '26. 🔗 Project: Carbon Copy. A GenAI-powered fake dating website critically examining AI's influence on social interactions. Published at CSCW '25 and exhibited at the 20th Athens Digital Arts Festival. 🔗 Project: Sketchar. A GenAI tool enabling game designers to prototype characters through sketch-based interaction with ChatGPT and DALL·E. Published at CHI Play '24 (PACM HCI).	
Center for Digital Innovation <i>Advisor: Xiaohua Sun, Weiwei Guo, Tongji University</i>	2022.12 - 2024.03 <i>Shanghai, China</i>
🔗 Project: DBS Digital-Twin System. A digital-twin system for deep brain stimulation surgeries, featuring 3D brain nuclei modeling in Unity and WebGL-based bidirectional communication. 🔗 Project: DHD Diagnosis System. A remote diagnosis system using digital human technology. Conducted research and led the design and animation development of digital human face and body.	

Selected Honors and Awards

- Excellent Master scholarship in Tongji University (**Top 2%**)
- Academic Excellence Scholarship in Soochow University (**Top 4%**)
- Academic Pacesetter in Turing Class(**Top 3%**)
- American New Concept Design Art Award (**Second Prize**)
- Mathematical Contest In Modeling (**Meritorious Winner, Top 7.5%**)
- National Computer Design Competition (**Third Prize**)

Skills

- **Skills:** PRD Writing, UI/UX Design, Data Analysis, Full-stack Development, English(CET-6)
- **Tools:** Figma, React, Flask, Blender, WebGL, Unity, BambuStudio, MySQL, LaTeX, Coze, LLMs
- **Programming Language:** JavaScript/TypeScript, Python, HTML, CSS, Arduino, C++, Java
